

AcXess Enterprise-Class Cloud Computing Services

Designed and Built on the Microsoft Cloud Computing Infrastructure and featuring the HP/Intel Blade Server architecture, AcXess has developed V-Works™ an Enterprise-Class Private Cloud Service with our automated Hyper-V management platform.

V-Works automation is used to manage thousands of large multi-GB Hyper-V Servers with full Enterprise Solutions in our Savvis data centers for Demos, Virtual training labs, Proof of Concept labs and production online service solutions.

The AcXess Enterprise-Class Private Cloud Service has delivered many thousands of hours of quality high performance Cloud services for Microsoft & Citrix employees and select partners.

V-Works can work for your approved ISV Partner Solution too – now on the Microsoft Online Demo Portal that thousands use globally!
